

ROBOTIC PALLETIZER

R-PAL 30

VERSATILE PALLETIZER

**ROBOT-PALLETIZER · AUTOMATIC PALLET DISPENSER
SINGLE-LINE PALLETIZING · MULTI-LINE PALLETIZING · UNIVERSAL
END OF ARM TOOL · PALLETIZER INTEGRATED OPTIONS**

ROBOTIC PALLETIZER

SINGLE-LINE PALLETIZER

Small footprint robotic palletizer - perfect solution for end-of-line automation. Robotic Palletizer can be offered with manual or automatic pallet handling. Automatic pallet dispenser is designed for safe automatic pallet feeding and includes high capacity pallet accumulator for longer autonomy. The system for automatic slip sheet dispensing is available upon request.

MULTI-LINE PALLETIZER

Multi-line palletizers are designed to palletize multiple SKUs simultaneously. Multi-line palletizers usually include variety of options such as universal robot end of arm tool, slip sheet and pallet handling, case infeed conveyors and pallet dispensers. Bar code readers, product and pallet labellers, vision system and other equipment can be integrated upon request.

It does not really matter what is your application, our automated system can palletize wide range of products: cases, bags, plastic containers, shrink bundles and more.

The advantages of robotic palletizer: control and interface are user friendly with operator and maintenance screens; robotic palletizer is efficient, low energy consumption system; low maintenance requirements; robot itself is a highly reliable piece of equipment that "never take breaks" and ensures continuous palletizing operation; palletizing robots are servo-powered and represent highly-customizable equipment.
